

1996 Dagger Crossfire

Serial Number: DAG53589[D6][96]

The D6 means it was molded in April and the 96 means its model year 1996.

Length 11 feet, Weight 39 lbs. Width 23.75 in.,

Cockpit 32 in. long x 18 in. wide

Ideal paddler weight range 90 to 190 lbs. Displacement hull, no flat bottom, round, forgiving and easy to roll.

Condition: Boat is in solid condition. Plastic does not have cracks, holes or repairs. Stored inside, and there does not appear to be UV damage to plastic. Has standard scratches.

Usage: Its length lends it to whitewater racing. This would win the St. Louis Paddlemania race. Ascends rapids better than any boat. Obviously it's not a play boat due to its length. It's still easy to spin and eddy in & out. Handles Class III rapids great.

Usage: Used on St. Louis (Upper and Lower), Bois Brule River, Wausau Whitewater Park.
